

REMARKS

This Application has been carefully reviewed in light of the Office Action mailed December 10, 2003. In order to advance prosecution of this Application, Claims 12 and 14 have been amended. Applicant respectfully requests reconsideration and favorable action in this case.

Claims 12-14 and 25-33 stand rejected under 35 U.S.C. §112, first paragraph, as not enabling any person skilled in the art to make the invention commensurate with the scope of the claims. Claim 13 has been canceled without prejudice or disclaimer. The Examiner states that the specification is limited to a digital mirror device and requests that the claims be limited to such a device. However, the specification clearly states at page 4, lines 2-31, that the claimed invention is related to an apparatus having a window sealed to a frame. There is no restriction in this portion of the specification that the claims be limited as requested by the Examiner. A digital mirror device is merely provided elsewhere in the specification as an example type of apparatus that uses a window sealed to a frame. Accordingly, the claims have been amended to be consistent with the specification. Therefore, Applicant respectfully submits that Claims 12, 14, and 25-33 are in accordance with 35 U.S.C. §112, first paragraph

Claims 12-14 and 25-33 stand rejected under 35 U.S.C. §112, second paragraph, as being indefinite. Claim 12 has been amended to address matters raised by the Examiner. Support for the amendment to Claim 12 can be found at page 16, lines 22-24, of Applicant's specification.

Therefore, Applicant respectfully submits that Claim 26 is patentably distinct from the proposed Seelen, et al. '475 - Applicant's Information Disclosure Statement combination.
